## 5. How to add a new form

- Form Builder Pro > Form > Click to plus button:

- Fill your page information in tab “General Information”
- You have to enter “Form field”

- After that, click to tab “Form Builder”. Here you can custom your form.

- By hold your mouse and drop any fields to your form. You can build your own form.

- Next go to **Mail** tab

Admin Email Address: By default the module will load *Shop Email*. You can see your shop email in *Preferences > Store Contact > Contact Details > Shop Email*. Alright. You can remove and add more email address. Just typing and hit “Enter” keyboard.

Last step. You go to tab “Message” to configuration success or error message.

After you save. You will see the data in top:

### III. FAQs

Q. How to validate a field?

A. When you create a field. Example textbox you will see an option “Require field” and “Validation type”.

Q. Can I send email to customer who submit my form?

A. Yes. It is possible. You have to create an email field in your form. Let's follow me

Now go to tab “Mail” enter “Field Name” to “Sender email”

Send email to Sender  YES  NO  
*Yes if you want send message email to sender w*

Sender email   
*Sender email will be get from form data. So you enter variable of the field. Example: `{input_145}`*

Remember you have to select "Send email to Sender"
