

USER GUIDE

Upload product image from URL

I. INSTALL MODULE

Please read this tutorial: <http://addons.prestashop.com/en/content/21-how-to>

Or: <http://addons.prestashop.com/en/content/13-installing-modules>

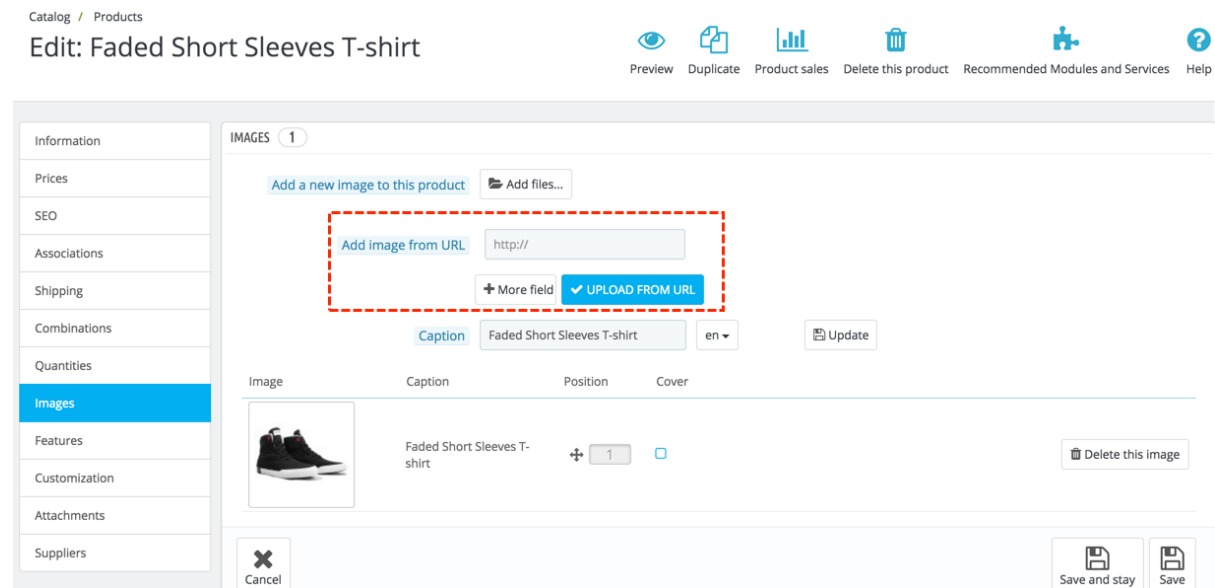

II. USE MODULE

1. How does it work?

The module allow you to add, upload image to a product from url (from internet). You don't need download your image to computer anymore.

2. How to use

After install the module. You click to a product then click to **Images** tab

The screenshot shows the Prestashop admin interface for editing a product. The breadcrumb is 'Catalog / Products' and the page title is 'Edit: Faded Short Sleeves T-shirt'. The top navigation bar includes icons for Preview, Duplicate, Product sales, Delete this product, Recommended Modules and Services, and Help. On the left, a sidebar menu lists various product management options, with 'Images' selected. The main content area is titled 'IMAGES 1' and contains a form for adding a new image. The form includes a text input field for the URL, a 'More field' button, and a blue 'UPLOAD FROM URL' button. Below the form, there is a table with columns for 'Image', 'Caption', 'Position', and 'Cover'. The table contains one row with a small image of a t-shirt, the caption 'Faded Short Sleeves T-shirt', a position of '1', and a 'Delete this image' button. At the bottom of the page, there are 'Cancel', 'Save and stay', and 'Save' buttons.

You must enter url to “Add image from URL” field. Then click to “Upload from url” button.

If you want to add multi image, you can add to “More field” button.

3. NOTE

The module is override AdminProductsController.php

Please contact to *Globo Software Solution Company* If the “User Guide” still can’t help you or you face any problem. We will support.
